Current Electoral Area Official Community Plan (OCP) Bylaw No. 2450, 2008	Proposed Electoral Area Official Community Plan (OCP) Bylaw No. 2905, 2021
<p>12.0 PARKS, RECREATION AND TRAILS</p> <p>12.1 Background</p> <p>Parks are generally publicly owned areas that provide an opportunity for individuals to pursue leisure and recreation activities. In the Plan Area, parkland includes Crown land, land owned by the Regional District, land zoned for park purposes and land designated as park on a subdivision plan. Parkland also includes land or general areas that the Regional District may have an interest in for park in the future.</p> <p>Some of the types of park and recreation facilities under the Parks, Recreation and Trails (PR) designation in the Plan Area include:</p> <ul style="list-style-type: none"> • Regional Parks: Osoyoos Lake Regional Park is operated and maintained by the Regional District. • Kettle Valley Railway (KVR) Trail: The sections of the KVR Trail that are publically owned and maintained by the Regional District are designated Park, Recreation and Trails. • Provincial Recreation Areas: swiws Provincial Park (formerly Haynes Point) is a provincially designated Recreation Area. <p>The Plan Area also provides diverse recreation opportunities for a range of trail users. Local residents use the trail system for activities ranging from an evening stroll along the KVR to commuting to work from one community to another, to active motorized and non-motorized trail-based recreation. Visitors also frequent the Plan Area’s trails to participate in a wide range of activities from walking and backcountry hiking to cycle touring and off-road vehicle recreation.</p> <p>Together, parks and trails provide a valued amenity for Plan Area residents and visitors and provide important environmental benefits. While the Plan Area includes only one small regional park, the need for additional community parks is moderated both by the area’s small population and the extensive opportunities available on Crown land, area lakes, and in provincial protected areas. It is also a challenge to provide community park services to areas with small, dispersed populations.</p> <p>Provincial legislation authorizes the provision of land to the Regional District as parkland — equivalent in size to 5% of the parcel being subdivided. It is anticipated that acquisition of new land will be focused upon completion of the Kettle Valley Railroad (KVR) trail and improving Osoyoos Lake access, although the Regional District will consider acquiring new parkland as opportunities arise.</p> <p>In 2012, the Regional District adopted a <i>Regional Trails Master Plan</i> that defines future direction, policies, priorities, standards and actions for the Regional District and its partners with respect to existing and potential future linear parks and trails and support of a regional trail network. The plan provides the basic framework to define and guide regional trail development and management through to 2021.</p> <p>See Schedule ‘E’ (Road and Trail Network Plan) for a map of designated trails in the Plan Area.</p>	<p>15.0 PARKS, RECREATION AND TRAILS</p> <p>15.1 Background</p> <p>Parks are generally publicly owned areas that provide an opportunity for individuals to pursue leisure and recreation activities. Similkameen) area, including BC Parks' South Okanagan Grasslands Protected Area, much of which covers the western side of the Plan Area. This national park would protect the area’s ecological-diversity and integrity, strengthen relationships between all levels of government, and bring economic opportunities. See Schedule ‘C’ (Parks, Recreation and Trails) for a map of designated trails in the Plan Area.

Figure 1: Proposed South Okanagan National Park Reserve

12.2 Objectives

- .1 Provide a level of parks and recreational opportunities that can meet the needs of local residents, within their ability and resources to pay for such facilities.
- .2 Promote recreational opportunities that meet local needs and complement the natural environment and existing resources.
- .3 Improve and maintain public access to park and recreation resources.
- .4 Promote the development of an integrated trail and park system.
- .5 Identify and work to acquire parks and recreation sites to meet the present and future needs of residents.

12.3 Policies

15.2 Objectives

- .1 Provide a level of parks and recreational opportunities that can meet the needs of local residents, within their ability and resources to pay for such facilities.
- .2 Promote recreational opportunities that meet local needs and complement the natural environment and existing resources.
- .3 Improve and maintain public access to park and recreation resources.
- .4 Promote the development of an integrated trail and park system.
- .5 Identify and work to acquire parks and recreation sites to fairly and equitably meet the present and future needs of residents.

15.3 Policies
