Notes on waste composition (problematic items, packaging trends, observations, etc)

Recycling stream was mostly paper and plastic drink cups, and clean plastic and paper take-out containers. Some cardboard from vendor set-up

Depot items stream contained lots of plastic water bottles, some juice boxes, and lots of plastic overwrap from vendor set-up.

Compost: Lots of paper plates and napkins, soiled paper take-out containers, some food waste. Any liquid left in cups was dumped in compost

Other items: Mostly chip bags

Garbage: Soiled plastic containers (too dirty to recycle), straws, some meat and bones from food waste. A broken frisbee

Total Recycling	222 L
Total Depot items	54 L
Total Compost	60 L
Total Other	5 L
Total Garbage	24 L

	Volume	Percent
Total Diverted	341 L	93%
Total Garbage	24 L	7%

Total Waste	365 L
