

RESIDENTIAL WATERING

RESTRICTIONS FOR SYSTEM USERS

STAGE NORMAL – REDUCE 30%

Last night, due to the extreme heat wave water use in Naramata was exceeding the systems ability to meet the demand safely and we struggled to keep enough water in all parts of the system.

RDOS is asking all Naramata residents to **reduce overall water usage by at least 30%** until temperatures return to normal. This will help to guarantee a safe, uninterrupted supply of water for domestic, agricultural and fire fighting demands.

Watering days and times are below, however if we cannot maintain required supply, we will be moving to Stage 1 – which drops the watering days down to only two days per week. Please do your part and let friends and neighbours know that may not be online.

Even numbered properties → Tuesday, Thursday and Saturday

Odd numbered properties → Wednesday, Friday, and Sunday

Watering Established Lawns, Shrubs/Flowers	Newly Planted Sod, Trees or Flowering Shrubs
<u>Manual Sprinklers</u> 3 days per week 6:00 AM to 10:00 AM 6:00 PM to 10:00 PM On your watering day	<u>Seeded lawns or turf:</u> - Any day at any time using any method for the first 49 days after installation of seeded lawns.
<u>Automated irrigation systems</u> 12:01 AM to 6:00 AM On your watering day	<u>Trees and flowering shrubs:</u> - Any day at any time using any method for 21 days after planting of new trees and flowering shrubs. Stage 1 restriction are required after 21 days
