

EMERGENCY WATERMAIN REPAIR OKANAGAN FALLS WATER SYSTEM LOWER ZONE

February 23, 2026

RDOS Public Works crews are conducting an emergency watermain repair this morning on Cedar St. in the Lower Zone of Okanagan Falls. This work may stir up sediment in the Lower Zone of the water system, resulting in discoloured water. If you do encounter sediment or discolouration of your water, the RDOS asks for your patience and to follow the recommendations listed below.

If you experience discolouration or sediment in the water, run your cold-water taps only and/or garden hose until the water runs clear. Minimizing the amount of hot water usage will limit the amount of sediment that could enter and settle out in your hot water tank.

In addition, residents should check the water quality before laundering clothing during this time to minimize potential staining or discolouration.

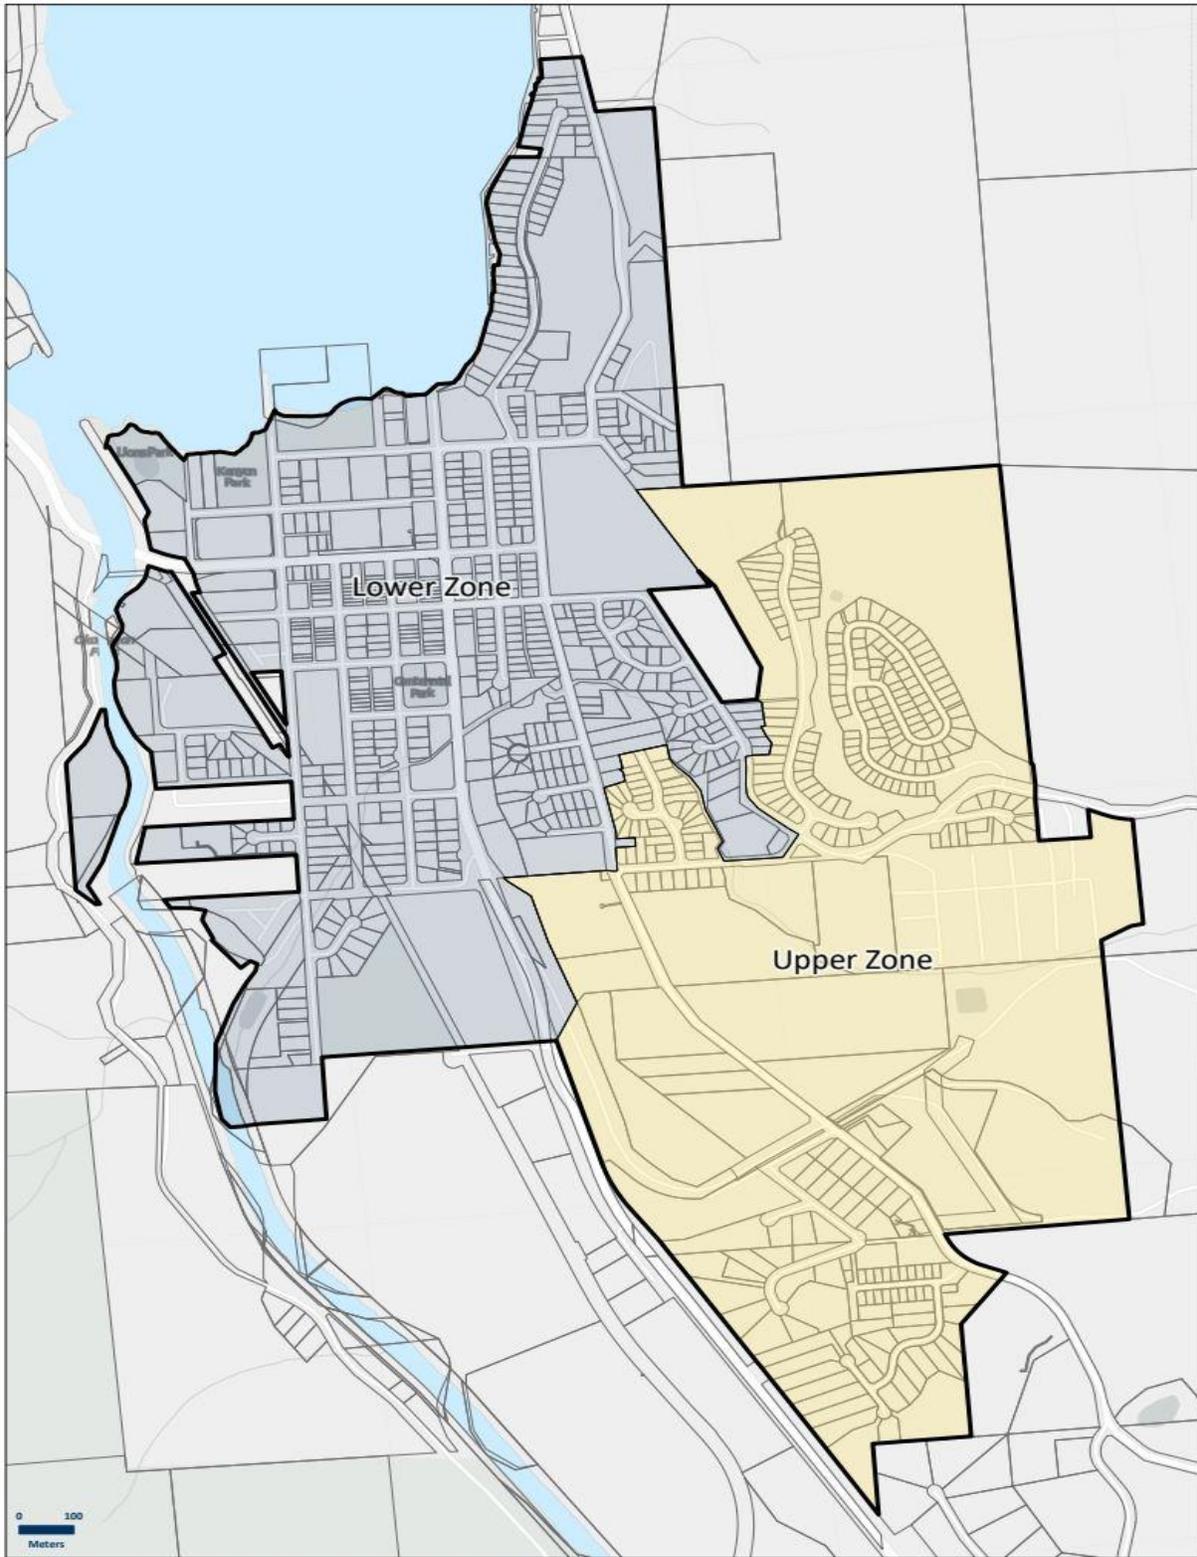

For further information, please contact RDOS Public Works at 250-490-4135 during regular business hours, Monday through Friday.

For after-hours water emergencies, please call RDOS Regional Dispatch at 250-490-4141.

Thank you for your cooperation.
