[WORKSAFE BC OHS Regulation 20.112 Hazardous materials](#) (updated February 1st, 2015), requires an assessment and abatement of hazardous material (asbestos etc.) be done by a qualified professional before any demolition or salvage of machinery, equipment, a building or a structure, or the renovation/alteration of a building or structure.

Disposal criteria for RDOS Landfills: see: “Required Steps”, and *RDOS Landfill Waste Disposal Application for Demolition & Renovation Waste*, page 2 “Hazard Assessment Documentation”. Both are posted on RDOS website: www.rdos.bc.ca/demo
