Clarification of what is being applied for. A TUP for up to three years. We would like to store our 2010 19' Jayco recreational vehicle (trailer) and 3 steel 10x20 storage containers. Two of the containers are side by side and the third is approximately 100 meters down the driveway and less than 5 meters lower in elevation. All three containers are being used for storage. They all have been modified by the manufacturer with doors for easy access and windows for light. None of them have electrical or plumbing. The trailer will be stored on the property and will be relocated when we are able to buy a home in town. Attached please find the recommended signage requested. I believe you have the rest of the information you need and we can get closer to closing this file.
