## RESIDENTIAL WATERING RESTRICTIONS FOR SYSTEM USERS

### STAGE NORMAL

The Regional District reminds residents that **Stage Normal** watering restrictions are in effect year-round or until situations change.

<b>Even numbered civic addresses → Tuesday, Thursday and Saturday</b>
<b>Odd numbered civic addresses → Wednesday, Friday, and Sunday</b>

The hot sunny weather is resulting high water usage in Willowbrook that cannot be sustained. In order to ensure that there will be enough water in the reservoir for fire fighting, we are reminding residents to adhere to the current watering restrictions so that we don't have to increase restrictions for all and move from Stage Normal to Stage 1.

Please see the screen shot from the SCADA program that indicates the pumping and usage trend over the past few days. The purple line is the reservoir level the blue line is the pump running non stop and not keeping up to the reservoir decline.

Pump starts and reservoir fills at regular intervals; all is fine

Pump starts, stays running and cannot keep up with drain on reservoir

Reservoir level alarms
